

Measure before you order

Record inches unless you clearly label another unit. Use the exact model drawing.

Model, variant and current manual / drawing:

Usable wall width / clear height / clear floor depth:

Mounting envelope incl. brackets / stringers / baseboard clearance:

Stored depth / open depth / folding path:

Bar overall length / sleeve-loading space / bench position:

Cable travel / body movement / overhead reach / door routes:

Bar, plates and bench storage / finished floor and slope:

Mounting permission / installer and manufacturer questions:

Confirm wall structure, attachment method and intended use with a qualified installer.

A machine capacity label does not certify your wall. Never improvise anchors or shims.

Check the full movement with your actual equipment before ordering.

Compare the complete setup

Enter your own quotes. Leave unknown costs blank; do not treat them as zero.

Machine / configuration / seller:

Wall assessment / hardware / installation / later wall repair:

Bar / plates / collars / approved protection / handles:

Bench / storage / flooring / other equipment:

Shipping / tax / recurring fees if any:

Total known one-time cost / costs still unknown:

Installer confirmation / approved accessories / restrictions:

Loading and storage rehearsal / unresolved space problems:

Order only after the room, equipment and installation plan are confirmed.

Follow the current manufacturer manual and inspection requirements.

This worksheet is not a structural assessment or an individual training prescription.
